FORMDESIGNER...

REPRESENTATIVE ERP DOCUMENTS IN NEXT TO NO TIME

A great deal of time and thought is spent on creating the right image for your company. Carrying through consistency of your house-style on all out-going documents is part of this. You encounter font and lay-out limitations when creating ERP documents. Often your stationery is the only house-style element. With FormDesigner you can give all your documents the correct appearance in one operation

"With FormDesigner we have access to all possible fonts and lay-outs and are no longer bound to the disproportionate Courier font."

FROM STATIC TO DYNAMIC! ARE YOU COMING?

Your ERP documents will never look like static boring ASCII-orientated documents again. That's the magic of FormDesigner. The software is fully integrated in your ERP system; that means that you work within the structure of your system. You can convert your original ERP documents to Graphical Designer in one go. This gives you the opportunity

to adapt your base document without having to completely re-formulate it.

You keep your business logo and you add more dynamics, thereby easily creating the graphic style you want for your documents, such as quotations, orders, invoices, price lists and reports, in conformity with your company image.

UNIQUE SOLUTION

FormDesigner is more than an intelligent software solution that only affects the graphic style. All the data in your ERP system is used one to one. This prevents mistakes in numbers, prices and such like, hereby giving you the freedom to determine the appearance. Simply by linking report-elements to style-sheets, you change the font and/or the colour of your document. Is your font not defined as standard? No problem for FormDesigner; you simply create a new style-sheet.

You can also place images, photos and/or barcodes

wherever you wish by means of the drag and drop technique.

DIRECT RESULT

You can immediately see what you have adapted, and if it is not exactly what you wanted then you simply adapt what you've done until the desired result is achieved. When the document is ready, you load the designed document into your ERP system.

Once that has been done,

everyone within your organization can use it.

"Met FormDesigner hebben we eindelijk een volledig geïntegreerde oplossing voor design en distributie van onze ERP documenten."

ADD UNLIMITED INFORMATION, POSSIBLY DEPENDENT ON CONDITIONALS. FOR EXAMPLE: HEADERS, FOOTERS, ANNOUNCEMENTS, GENERAL CONDITIONS DEPENDENT ON, FOR EXAMPLE, CUSTOMERS/CLIENTS, COUNTRIES, DATES, ETC. ETC.

IN THE GRAPHICAL DESIGNER YOU CAN EASILY ADAPT YOUR DOCUMENTS TO YOUR OWN REQUIREMENTS AND/OR COMPANY IMAGE.

MULTI-CHANNEL DISTRIBUTION

The advantages of FormDesigner don't stop there. When the design is ready and the document is being used in practice, then it can be sent to all destinations with just one press of the button. You decide which. A document is converted to Word, PDF or HTML file. Then the document can be sent to several printers,

an unlimited number of e-mail and/or fax addresses. Automatic archiving even takes place on index file basis. Ultimately, you have personalized documents at your disposal, in any desired language, that find their way to clients and contacts by intelligent distribution. And all 100% integrated in your ERP system!

FROM STATIC TO DYNAMIC

OPERATIONAL WITHIN 1 DAY

GETTING TO IT INDEPENDENTLY

FormDesigner is an easy-to-install application. After half a day's installation, half a day's training for creating forms follows. For this, existing business logic is used. After training, you can independently create documents and make them available to the department that will use them.

LIVE WEBDEMO

Do you first want to see real-time what FormDesigner could mean for your company? If so, you can interactively view the possibilities. You'll get a short introduction at a time that suits you, live via internet. Our sales advisers will show you real-time how the programme works and that the possibilities are endless. Interested? If you are, contact one of our resellers or visit our website: www.hidox.nl

"By using FormDesigner in ERP LN, we have been able to design a wide variety of documents in an efficient way."

ABOUT HIDOX

High-end documents. That is what Hidox advocates.

Hidox translates its practical knowledge and experience of ERP systems into intelligent, revolutionary, fully integratable IT solutions.

The objective? To offer the user dynamic tools that in a fast and user-friendly way increase the functionality of ERP systems.

DISTRIBUTION STRUCTURE

As deviser, designer and manufacturer of intelligent software tools, we have chosen to sell our products through a specialized dealer network. This means that, on the one hand, information about you as client is secured at one point of contact. On the other hand, we ensure, via training and technical support, that our resellers are always up-to-date on the latest developments and possibilities. In this way, we make sure that you can always rely on personal guidance and support.
